Your letter of application is due on or before February 17, 2008. Please describe your personal and/or professional goals in completing this training. Also, please include a description of any shamanic-type practices in your life.

In addition to instruction, training and supervision, this program will also include some work with nature and crafts, as well as ceremonies. The basic material in the course has been written by Sandra Ingerman and Karen is recognized and approved by Sandra to offer it as a residential program.

The material covered will benefit everyone who takes it, as the group will grow together over the two years. There has been talk of periodic 'meetings' being held throughout the duration, particularly for local professionals who would like more support integrating shamanic practices into their day-to-day.

Please mail your application to: Karen Rice King / P.O. Box 785 /
