

Sleep Study for Adults

Natural Awakenings, June 2012, p. 7

Master Dowser Karen Rice King is launching a professional medical study of sleep issues in adults. The research will involve an installation of Earth Acupuncture rods on properties to scientifically test whether they are effective in improving the owners' sleep issues.

“For over 20 years, many clients have experienced a positive change in their sleep patterns with Earth Acupuncture,” says Rice King. The study will allow scientific proof of the efficacy of Earth Acupuncture. Karen and her certified apprentices will be involved with the installations and data gathering over a period of six months. For this project Karen is discounting the Earth Acupuncture installation by 35% of the usual rate.

To find out if you and your property are qualified for this project, or to have your property tested, please contact Karen at Karen@KarenRiceKing.com or call 303-665-0175. KarenRiceKing.com.
